MartinLogan Clarity™

Something extraordinary for your eyes and your ears.

At MartinLogan we begin each day focused on our dream of creating the perfect marriage of unlimited performance and exquisite design—delivering pure sound beautifully.

MartinLogan's unique, thin-film ESL (electrostatic loudspeaker) technology brings new levels of precision to sound. Originally conceived in 1923 alongside cone drivers, ESL's have long been heralded by experts within the industry as the superior technology. However, ESL's were not practical until modern aerospace materials became available in the last two decades. Since 1983 MartinLogan has continually advanced ESL technology and set the standard for ultimate, no compromise sound—taking ESL technology out of the laboratory and into your living room. For full details regarding the ESL concept visit www.martinlogan.com.

The Clarity speaker system brings a rich cinematic experience into your home theater—without compromise. The heart of the Clarity is a Generation 2 electrostatic transducer with an ultra-thin diaphragm that precisely tracks the input signal and flawlessly transmits clean powerful sound. MicroPerf™ stator design maximizes efficiency and dispersion of sound and also increases optical clarity.

MartinLogan ClearSpars™ elegantly suspend the diaphragm between the stators and accentuate Clarity's exclusive transparent look providing incomparable sonic accuracy, efficiency, and dispersion.

Clarity's unique NAC™ (Natural Ambience Compensation) driver extends full range reference level sound to the entire home theater audience, regardless of their location. A true audiophile solution, the NAC is parallel to the signal path and features an on/off switch to adjust for listener preference.

Clarity's high-resolution aluminum woofer delivers extended bass detail with explosive power. Its low-voltage power supply simplifies installation and maximizes placement options. Clarity is available in three beautiful color palettes—hardwoods, metallic accents and fabrics—which will enhance both your home and lifestyle. Find out more about the Clarity at www.martinlogan.com.

Specifications

FREQUENCY RESPONSE	46–22,000 Hz, ± 3db
HORIZONTAL DISPERSION	30 degrees
VERTICAL DISPERSION	26" (66cm) line source. NAC enhanced sound field.
SENSITIVITY	89 dB/2.83 volts/meter
IMPEDANCE	6 ohms, 1.1 @20kHz
CROSSOVER FREQUENCY	450 Hz
COMPONENTS	Custom-wound audio transformer, air core coils
NAC DRIVER	1" (2.5cm) soft dome
WOOFER TYPE	8" (20.3cm) high excursion, high rigidity cone with extended throw driver assembly, non-resonance asymmetrical chamber format; bass reflex
POWER HANDLING	200 watts/channel
WEIGHT	31 lbs. each (14.1 kg)
SIZE	10.2" w x 12.25" d x 53" h (25.9cm w x 31.1 d x 135 h)
